Don't be afraid of the future
It's the only way out of the past
Out of the now, out of the anything
And there's nothing left but anything

And don't be afraid of the future
It doesn't include you, it only removes you
And everybody knows the secret
Of science is that you can't last

The next great failure of man
The next great failure of man

(Alright)

It seemed so simple
You can't survive
You saw it coming
And so did I

The next great failure of man
The next great failure of man

Everybody gets the same
Yeah, everybody they're gonna get the same
Mechanically inclined to destroy and lend out your
mind
And thought out the pieces for ya

And don't be afraid of the future
Cause you aint showing up
Go start the riot
Cause the truth is you can't last

The next great failure of man
The next great failure of man

(Alright)

It seemed so simple
You can't survive

You saw it coming
And so did I

The next great failure of man
The next great failure of man

I am one, and you are not
Revenge is here, in case you forgot
That the future is the end of tomorrow
And everybody steals, will take and borrow

Capable of absolutely nothing
Let's make this fighter of the past
Now I understand what you're doing
But you can't last

The next great failure of man
The next great failure of man

(Alright)

It seemed so simple
You can't survive
You saw it coming
And so did I

The next great failure of man
The next great failure of man
