At night I wake up from my sleep  
There's no one else around  
The evil river runs so deep  
And I can hear a sound

I'm lost and alone  
I can feel reality  
And my heart turns to stone  
Take this pain from me

There's nothing more to fear  
The end is coming near

Gods of War

And the thunder starts to roar  
When the bell starts to chime  
Revolution is the law

With the power from inside  
Never do what we are told  
We're ready for the fight  
Our souls cannot be sold  
We're warriors of steel  
We're marching on with pride  
We're gonna make you feel  
The power of the night
