Fencewalker don't play no games with me, cause i don't like your ways. You've got two faces that i see. Yeah your gonna pay. You burn your candle at both ends. You can only lose. Today who the fuck's your friend ... time for you to choose. You're gonna have to take one side, but please not mine. If you think that way half the fuckin' time, we don't want your kind. Gave you the benefit of the doubt. should never have. This scene wants you the fuck out. Makes me so damn mad. Fencewalker won't walk that fence no more, 'cause i'll knock you down. Two faces just can't be ignored. Change your ways or don't come around.
