I'll follow the sun
Into a new day
I'll follow the sun
Right to the place I wanna be
We can make the world go round
Why don't you follow me
Right to the place I wanna be
Yeah, we can make
The world go round
Why don't you follow me
Right to the place I wanna be
Dreams can make you happy
If you really let them win
We can make the world go round
There's so much to begin
I know a better place
I need your warm embrace
Take my hand
I'll take you to the land
Where you've never been
With you by my side

I can ride to the moon on a violin

You make me feel so right

I need your love tonight

Rap:

Sun shining in my face

And feel the need for some

Sunny place

Up and away from

Hustle and bustle of the city

Where life is such a pity

I need you right here in my arms

Underneath the shade of sunny palms

Where the skies are blue

And we can have some fun

I'll follow you

Like I'll follow the sun
