Stay
Stay, ooh, yeah stay, ooh, yeah
Can you stay, stay
Stay with me my girl, yeah

Baby can you stay just a little bit longer
Come a little closer and lay your head on my shoulder
The night is gettin' older take what you're gettin' colder
I just wanna hold you, so baby won't you stay wit me
tonight
I wanna put this lovin' on you, you

Now close your eyes and stay a little longer girl
I'll protect from the world
These feelings I got for you growin' oh, so stronger girl
I know we had some problems in our past relationships
Shared so many tears I wasn't there but baby I'm right
here

So put your phone on mute I'm here to soothe you
Through all the pains that's stressin' you
So relax lay back and be comfortable
Even though you my ex girl to me you still my next girl
Infatuated with things you do you sweet plus you my
best girl

I'm on my knees beggin' you please baby stay don't go
away
But it's gettin' late and I can see da expressions on ya
face
I'm ready to settle down and share a couple of kids wit
you
Travel overseas wit ya fulfill my every dreams wit you

Baby can you stay just a little bit longer
Come a little closer and lay your head on my shoulder
The night is gettin' older take what you're gettin' colder
I just wanna hold you, so baby won't you stay wit me
tonight
I wanna put this lovin' on you baby

Yeah, stay

Stay wit me my girl, yeah
Stay, stay ooh, yeah, stay

Come on over here baby
Hold on, hold on [Incomprehensible]
I know I've been real busy
Not paying you any attention but tonight is your night

You know I really love you
I even got your name
Tattooed backwards on my chest
So only my heart can read it
I love you baby

Stay, stay wit me my girl, yeah
Won't you stay wit me tonight, I wanna put this lovin' on
you, babe

Yeah baby love is pressure
But I'ma still address you make da night real special
Wine an' dine just to impress you
Make love to you on top of the dresser

We ain't gotta get straight down to business
Although your lovin' is generous
I knew that you could never picture this
Me as a respectable gentlemen

Stay wit me, I'm down on bended knee
Ain't no cuppa plea 'cuz I want you here with me
Kissin' and cuddling baby romance me
Show me how it's supposed to be

Baby Blue still a G, girl, it's plain to see girl
We was meant to be makin' history
Carvin' our names in trees
Mixing birds and bees, stay wit me

Stay, stay
Stay wit me my girl, yeah
Stay, ooh, yeah, stay
