Infinite communication  
Hyperflash in information  
We are flooded by this media overkill

Involuntary education  
Predestined destination  
Brainless servants of the new society

Open your eyes  
New generation  
Beware of the danger

You're controlled  
Mind violation  
You're controlled  
Directed nation

Supervised but you don't see it  
Take good care beware of this shit  
Hidden messages  
In every sensual overflow

To oppose the supervision  
Take it as your private mission  
A warrior for the free in mind eternally

Open your eyes  
New generation  
Beware of the danger

You're controlled  
Mind violation  
You're controlled  
Directed nation
