To come down from above must be like taking the
plunge
Won't know what has hit you
To take life like a stick, play right through the trick
Now we know what you should do

And so we come on the road, ten seconds to go
Let the moment surround you

And so we come back again, just like a merry-go-round
And will we ever learn where to get off
And so we start it again, with Mr Mister and friends
And then we use it til we start to get soft (and, uh)
Clap Clap goes the hands up to me
Dance Dance as we fall in the dark
I don't like being stepped all over
Maybe Maybe we should start all over again

To creep up from below must be like missing the show
We won't know 'til it gets you
And so the cycle returns, new troubles emerge
Now we know what the left do

Where to get off
And then all over again, with Mr Mister and friends
And then we use it til we start to get soft (and, uh)
Clap Clap goes the hands up to me
Dance Dance as we fall in the dark
I don't like being stepped all over
Maybe Maybe we should start all over again

Oh, wee!

And so we come back again, just like a merry-go-round
And will we ever learn?
Clap Clap goes the hands up to me
Dance Dance - Fall in the dark
I don't like being stepped all over
Maybe Maybe we should start all over again
