"Dreamer"

Eye was born & raised on the same plantation
In the united states of the red, white and blue
Eye never knew that eye was different
Til dr. king was on the balcony
Lying in a bloody pool
Expected so much more from a loving society

A truthful xplanation but you know what?
Eye got another conspiracy

If it was just a dream... call me
Call me a dreamer 2
With more rewards & accolades
Than anyone b4 or after
21st century, oh what a shame
That race still matters
A race 2 what and where we going?
We r in the same boat
But eye'm the only one rowin
Last time eye checked you were sleepin'
...but you can call me a dreamer 2
Peanut butter logic served on a bed of lies
Don't go down 2 easy
When you see ur father cryin'
Have you ever clutched the steering wheel
Of ur car 2 tight?

Prayin' that the police sirens
Pass you by at night?
While the helicopter circles
& the theory's getting deep
Thing they're spraying chemicals over the city
While we sleep?

From now on eye'm staying awake...
So you can call me a dreamer 2
Wake up wake up
