"Hold Me"

Visit "[Hold Me](#)" on MotoLyrics.com

Someone said what someone saw and now we can't be lovers

Who do we believe when we can't believe each other?

If U and I are lost because of what some people say

Then there's no justice in this world 2day

CHORUS:

Hold me and we can make it through the rain

Hold me and we can weather any pain

If U and I are lost because of what some people say

Then there's no justice in this world 2day

Hold me and make this world just go away

All my life I've longed 4 someone just 2 be in my corner

2 believe in me when no 1 else did, that was all I wanted

And when U came into my heart, joy was all U made

I can't believe this is the same heart that U want 2 break

CHORUS

It seems like only yesterday U said U loved me

U said I was your universe with only God above me

How could U say all those things and lead me on this way?

2 think that I could give U up 4 what some people say

Hold me and we can make it through the rain

Hold me and we can weather any pain

If U and I are lost because of what some people say

Then there's no justice in this world 2day

Hold me and we can make it through the rain

Hold me and we can weather any pain

If U and I are lost because of what some people say

Then there's no thread of justice in this world 2day

Hold me and make this world just go away

Hold me and make this world just go away
