Only fifteen percent
have half a brain in their heads
Only fifteen percent
realize what's been said

You're late for an evolution
You've missed it by a day
No means for a solution
You've missed it by a day

Only fifteen percent
really grasp the concept
The rest underdeveloped
can't even get their mindset

Only fifteen percent
and that's the God awful truth
The other eighty-five percent
can't understand the youth

You're late for an evolution
You've missed it by a day
No means for a solution
You've missed it by a day

What would happen if
you found out what you're missing
A lack of compassion
for a world that won't listen

Only fifteen percent
and the rest don't have
A fucking clue
