Inside - Freaking out  
Mankind - What's it about  
Unite - Live for your brother  
In spite of all others

Creating better images  
Not hating in massive doses  
You're fading into obscurity  
With all of your explosives

Take all of the gossip  
Make it kill itself off

Try to believe  
Things can be changed  
Wounds will heal  
And rearrange

Timing is all it takes  
Finding all your mistakes  
Admitting to yourself  
Not kidding your mental health

Do not hold it back  
Why turn your head and laugh?  
You are the one to blame  
For your life being insane

Take all of the gossip  
Make it kill itself off

Try to believe  
Things can be changed  
The wounds will heal  
And rearrange

You're performing  
Self-discovery  
There's finally  
Self-discovery
