20 years ago  
I left the earth  
In search of peace  
And a release

It was a fantasy  
Something I had to see  
No pollution  
Or corruption

So I deserted  
My home planet  
Somewhere to live  
Where nobody ran it

When I got out there  
Little did I know  
There would be lifeforms  
I'd have to overthrow

Traveling in space  
Wandering through time  
What's this I've come across?  
Must be an alien enzyme

Try to sneak a glance  
Now I have no sight  
From the blistering heat  
I have lost my eyes  
In colour...

I am losing my soul  
Swallowed by the black hole  
Unknown has won  
Returns to sun

When I got out there  
Little did I know  
There would be lifeforms  
I'd have to overthrow
