On mountains high, the sun and sky
To valleys low [Incomprehensible]

We done walked these valleys
We done crossed these seas
Ain't too many out there
Still fightin? enemies

We done climbed these mountains
From dawn till night
Ain't too many out there
Still puttin? up a fight

No election, remember that presidential selection
Got us in another erection of body part
Dick, Bush and Colin, tape is rollin?
New world order flowin? way past deodorant

Got the masses ignorant, them dumb asses
The world surrenders to the way of the Beltway
Created another Bin Laden, found Saddam
Yo Griff, tell what good is a goddamn bomb?

I know they been lyin? ?bout Bin Laden fight the power
When you don't know who hit them towers
And they no care, Tony Blair
As the axis of hate is the UK, the 51st state

We done walked these valleys
We done crossed these seas
Ain't too many out there
Still fightin? enemies

We done climbed these mountains
From dawn till night
Ain't too many out there
Still puttin? up a fight

Gettin? the bomb shit ain't like gettin? bombed and shit
Orders from the commander and thief head chief,
handkerchief
Ain't that right Griff? You gonna go in there and take

things
And bomb thangs, 2000 high tech gang bang

I rather be gettin? it than gettin? hit
Presidential orders from this new world order
Stressin? people of color across the water and the
borders
People need food, education, employment, damn

We done walked these valleys
We done crossed these seas
Ain't too many out there
Still fightin? enemies

We done climbed these mountains
From dawn till night
Ain't too many out there
Still puttin? up a fight

And the rhetoric from one sided politricks
From a government on some old world war 3 trip
If I was there I'd quit and go home and be gettin? it
Stick a bush and dick in the world and watch it twirl

America's a dude and the earth a girl
You gotta fight for your love and remain a cut above
The rest of the world don't matter, sounds like
propaganda
New fascism on another channel
Turn off that thing and see the sun, son
I'ma take my black ass home and get someone

We done walked these valleys
We done crossed these seas
Ain't too many out there
Still fightin? enemies

We done climbed these mountains
From dawn till night
Ain't too many out there
Still puttin? up a fight

We done walked these valleys
We done crossed these seas
Ain't too many out there
Still fightin? enemies
