Seen you down the hall again today
With a fire your eyes that soon will go away
When you hear the truth of things to come
For the planet of the dying sun
It's all our fault, we knew it all before
But the jesus freaks had darwin stapled to the floor
Was it vanity or just an act of faith
Or a willing compromise, one cheney had to take

[Chorus:]

Our side is better than yours
We got the word of god in hand
It says right here in print
We got the right to take your land
Take more than you need,
Straight to hell on the back of the other man
Lines divide, social tribes,
Fuck the world I got my gun gripped, in my hand

I don't like to tell you that you're wrong
All the time, it's not my idea of fun
But you lack, the basic motor functionality
To see the crimes to nature, the genocidal siege
On the holy land, the hearts and minds, of babylon
defeat
You only understand your red eyed balance sheet
The everlasting thirst, I think it's time to feed
