There's a pain in my head and i can't reject it
every time I try to think I can't remember anything
It's getting bigger and bigger I can't squeeze the
trigger
make the pain just fade away drop another pill and stay

no pain no gain migraine
no pain no gain migraine

I met the messenger there's no message for me
looked through all the magazines but I can't find
anything
this pain is getting bigger I can't squeeze the trigger
there's only one option left
now this pain it's in my chest

no pain no gain migraine
no pain no gain migraine

I met the messenger there's no message for me
looked through all the magazines but I can't find
anything
this pain is getting bigger I can't pull the trigger
there's only one option left
now this pain it's in my chest

no pain no gain migraine
no pain no gain migraine
no pain no gain migraine
no pain no gain migraine , migraine
no pain no gain migraine, migraine
no pain no gain migraine
