The city's spins are weeping and our systems go
Come hitch a ride inside and watch the moon grow
It won't be long before we're up in zero G
Above the atmosphere just you and me and me

Planet Tokyo is a place not very far
In your stereo, it's as close as where you are
On the radio it's a sound that you can see
Planet Tokyo is the place you want to be
Tonight
Right

You're looking well but we can tell you need a fix
For something more than just another chick flick
A riff so strong that it belongs deep underground
A beat so sweet it makes you weep when you touch
down

Planet Tokyo is a place not very far
In your stereo, it's as close as where you are
On the radio it's a sound that you can see
Planet Tokyo is the place you want to be
Tonight

Planet Tokyo is a place not very far
In your stereo, it's as close as where you are
On the radio it's a sound that you can see
Planet Tokyo is the place you want to be
Tonight

In your stereo, it's as close as where you are
On the radio it's a sound that you can see
Planet Tokyo is the place you want to be
Tonight
