I kick your face, your proud face  
The balloon in the air is about to venture out  
You the last one to laugh? Who?  
Be careful you don't get lost  
Hey, I declare war on you  
Hey, it's about time now  
Your snobbish attitude, I know  
What's your main point  
Tired of hearing about your job  
Always, with hollow curiosity  
Now I take the lead  
Hey, I hope more than anything  
If together our collusion will most likely be abandoned

We also slip and slide through the word, you know  
If for life, we'll have an end to it sometime  
So you don't have to cry in the night anymore, ha!  
Your stubborn voice cuts the air, desire, fastball, right  
on the mark  
Saturday you try to look good and act as if you know  
Hey, darling you  
Hey, you're my secret these days  
Once you fail it will be amazing  
We also have tricks and make shifts  
If together our collusion will most likely be abandoned  
We also slip and slide through the word, you know  
If for life, we'll have an end to it sometime  
So you don't have to cry in the night anymore, ha!  
Ha! Ha! I don't care
