"Thank You"

Hey boy, hold your head up

Anytime, join hands
And connect

Because the round sun rises
Let's live large

Start walking on the endless road

The blue earth is in your hands
Hey girls, laugh
Again and again

Together, let's sing
As a breath of air breathes softly

Let your body go

Blossom under the spring sky
The huge universe is in your heart
Hey boy, hold your head up
Hey girls, laugh

Thank you everyone, everyone
It's so small and ordinary

The echo of this planet
