"Void"

Visit "[Void](#)" on MotoLyrics.com

You're sad cause you found yourself
And the boredom is killing you
You know all the cracks in your wall
They're staring right back at you
In time you will see...

You're not alone in this tonight
I know your void
The boredom is killing you, take flight
Away from your self

Disguise yourself in your masks
You're running away from life
You're balancing on the thin line
You'd better rush back to shore
In time you will see
There's no running...

You're not alone in this tonight
I know your void
The boredom is killing you, take flight
Away from your self

A restless static in your being
Alters everything you're seeing
When all the outlets seem so worn
You shouldn't feel so torn

You're not alone in this tonight
I know your void
The boredom is killing you, take flight
Away from yourself
You're not alone in this tonight
There's more than one
Person inside of you, take flight
Away from yourself...
