Pictures of you I cannot erase,
Constant memories an endless chase
The shape of your lips as you spoke
How hard you laughed at my stupid jokes

The passion we drew from each other's souls
Unfolding the fears, we stripped from our clothes
Together we were strong and alive
How could you let go, let this love die?

Catch me fast...

You defused me like I was a bomb
Prepared a speech to keep me real calm
I felt no anger, just frozen pain
It was you all lost in my veins

Catch me fast...

Remember you were always here
Together we were gonna last the years
How long will my falling last?
I'm needing someone to catch me fast!

Catch me fast...

Quickly in silence leaving your shame
Instilled with your guilt, I felt the blame
With no love to help my fading crash
I'm needing someone to catch me fast...
