"Still Right Here In My Heart"

Visit "[Still Right Here In My Heart](#)" on MotoLyrics.com

There's a silver moon in the midnight sky
And lovers are heart to heart
But love is a shadow
Lost in your eyes
And time has taken us apart
But it's so far away and so long ago
It's still so strong I want you to know

You're still right here in my heart
Where you've been right from the start
Still right here in my heart oh baby

There's a hollow sound in this empty room
Echoes in the dark
I wish I could wake and find you here
Give us another chance to start
But night after night day after day
I love you so much I still have to say

Well I wonder what you're feelin
Do you ever feel the same
When you listen to your heart
Do you ever hear my name
