Blood dripping from an open sky  
Hailing down on burning landscape  
Feeding the fire- breeding desperation  
Shadows follow the storms

This must be the day when angles destroy  
With flaming swords in their hands  
Forging our damnation that will be earth's liberation  
Striking in despair as laments from the tongues fill the  
air

Insanity- the end is near  
Humanity- the devil you fear

Time of descend is upon us  
Justice will be received as justice has been given  
Oblivious to our children's heritage

Apathy came with a price  
So let this be our sentence  
The ultimate price
