Never needed any help
Here I sat at home with myself
Contemplating all the time
You we're never in my life
I can see there's something new
You make my life seem so brand new
Recording the lines of time
Something I see in your eyes
Hooray for who
Hooray for me
Wherever you are
Simple things that I must have
Feels so good to make you laugh
Something older than for me
Wasn't something we can see
Why am I still here today
Makes me wish that I could stay
Don't want to relive this life
Taken everything in strife
Hooray for who
Hooray for me
Wherever you are
I'll be
