Visit "[This Time Next Year](#)" on MotoLyrics.com

I heard you call my name  
You were outside the door  
How did I not hear you before?  
A chance to be reborn  
To never be alone  
I should've done this long ago.

To find you wear a golden crown  
To be in light, transcending sound  
To be lifted from the ground.  
You're coming through now loud and clear  
My God you went for many years,  
Its good to have you here.

I heard you call my name  
You were outside the door  
How did I not hear you before?

I heard that there would come a day  
When you show up just like they said  
Do you always show up so unannounced?

The stars at night, they moved aside  
From where I stood, you shined so bright  
Take me back with you this time.

To find you wear a golden crown  
To be in light, transcending sound  
To be lifted from the ground  
The stars at night, they moved aside  
From where I stood, you shined so bright  
Take me back with you this time. (X2)
