Kick In The Ass Lyrics from DAMIR

Quench your thirst by word of mouth so to speak

It's for you to interpret

Like the air that is there

In your face you can't see it but you sure damn feel it

Plucking stars from the sky to create my own big dipper

I started seeing stars and the objects talk now

I put my eyes on my ears

To see what's going on

I spy with my blue eye the world is 'Yours to Discover'

LIKE ONTARIO.

It starts with a dream, turns to a thought, moves to I
think, you got the right idea. If we all had wings would
you still walk? Some would want to!

Would you?

Only a thought with a knot could stop you.

Get a move move on

You need a kick in the ass

Pull a rush in the front when you tell em to your face

Cause it don't make sense and it won't make sense

If you blind the eye

The eyes you see

If you close the mind

The mind you need

If you walk the way

The way to nowhere

Get on track

On track to somewhere

You got the gift

(I got the gift)

Get a move move on

You need a kick in the ass

Pull a rush in the front when you tell em to your face

Cause that's how you fix the shit that's been made

A new day a new rule

You got something to say

Sit still if you will but you will go astray

Connect the dots

All the days that you pictured a change a switch

Life's a bitch

Your silent your quiet

You don't exist

The big break is now in your life that you're living

Don't pick a card cause it's hard (move on...)

Don't know what you're getting

I speak to be heard

All is said never stop till the end

If it's gotta be said

Say it

If it's gotta be done

Do it

If it's said and done

You kick ass

Get a move move on

You need a kick in the ass

Pull a rush in the front when you tell em to your face

Cause it don't make sense and it won't make sense

If you blind the eye

The eyes you see

If you close the mind

The mind you need

If you walk the way

The way to nowhere

Get on track

On track to somewhere

You got the gift

Extinguish the bullshit

Respond to the negative

Cause we need more positive people out there

Back to the fundamentals

With a change with the times

I learn from mistakes

Cause we all make some

I remember where I came from
And I know where I'm going
Live for the moment
I'll do it tomorrow
It's taking forever
The future is now
Move on
Get a move move on
You need a kick in the ass
Pull a rush in the front when you tell em to your face
Cause it don't make sense and it won't make sense
If you blind the eye
The eyes you see
If you close the mind
The mind you need
If you walk the way
The way to nowhere
Get on track
On track to somewhere
You got the gift
I got the gift
