Baby, Im sorry
idk what happened I
somewhere down the line I lost my head
I did

I've been hanging with my niggas drinking on that hard
liquor
had a song out baby some how my head got bigger
been traveling around the world
2 of us's in jet planes
on major tours interviews everybody know my name
I was on every magazine cover
check billboards all the others
any awards I would get
girl you name it and I did it

just got back from out of town
and you're screaming out no more
cars outside you got your clothes
and then you walk up out the door

I could give a dam* about a hit
cause I only wanna be with you
and if my job means there is no more us then I quit
cause I only wanna be with you

So take me off the radio no more going to the studio
cause none of the ish is worth losing you naw naw
no more hanging with the thugs baby they can have
these clubs
I dont wanna live this good life without you

Ive been walking around the house bossing like i'm a
super store
throwing my weight, making demands and acting like
I'm God
I've been fronting (frontin) stunting 9stuntin)
too busy to hear you crying out when you was tryna tell
me something
going coast to coast show to show Charlie always on
the go
always got something to do if ain't rehearsal it's a

video show

just got back from out of town
and you're screaming out no more
cars outside you got your clothes
and then you walk up out the door

I could give a dam* about a hit
cause I only wanna be with you
and if my job means there is no more us then I quit
cause I only wanna be with you

So take me off the radio no more going to the studio
cause none of the ish is worth losing you naw naw
no more hanging with the thugs baby they can have
these clubs
I dont wanna live this good life without you

everything I have girl everything i own
all my cars all my clothes everyone of my homes
ill strike a match baby set it all on fire
before i lose you girl i will retire

I could give a dam* about a hit
cause I only wanna be with you
and if my job means there is no more us then I quit
cause I only wanna be with you

So take me off the radio no more going to the studio
cause none of the ish is worth losing you naw naw

I could give a dam* about a hit
cause I only wanna be with you
and if my job means there is no more us then I quit
cause I only wanna be with you
