Here I sit, all alone
I'll find a way home
Thanks for the promise
How could you do this to me?
I guess this is love
When it hurts so bad you think
You'd rather die
I guess this is love
When you're thrown around
Between the lows and highs
I guess this is love
When all you really want just
Kisses you goodbye
Not a call, not a thought
Your own world you run
If it's convenient, then you will do it
I guess this is love
When it hurts so bad you think
You'd rather die
I guess this is love
When you're thrown around
Between the lows and highs
I guess this is love
When all you really want just
Kisses you goodbye
I can't seem to find my door
That's all right give me some more
Leave me curled up on the floor
Fine, fine, give me more, fine, fine
I guess this is love, love
Goodbye love, goodbye, goodbye
Goodbye love, goodbye, goodbye
I guess this is love when you're thrown around
Between the lows and highs
I guess this is love
When all you really want just
Kisses you goodbye
