## "You and I"

Visit "[You and I](#)" on [MotoLyrics.com](http://MotoLyrics.com)

You and I will always be together  
Peace or war no matter the weather  
Me and you like birds of a feather  
Til the wind blows us away  
We stand tall while they fall together  
Gun left I formation like the letter  
Modeling the shelter cause we're built for whatever  
Til the wind blows us away

From the beginning it felt like we been in love  
We took at chance knowing how slim it was  
The world is ours now let's split it up  
And you know how short life is lets Big it up  
Lets get fitted up/Get it in and live it up  
Dinner plus the cinema then let's hit the club  
Posting up like both of us is spending wads  
Cause we didn't get it if it didn't come in him and hers  
Chemistry together just like a recipe/Or destiny we was  
meant to be together  
Don't worry bout me going left or doing you wrong  
We right for each other it's a beautiful bond  
We hug and touch we love and lust  
We last through the bashes we cuss and fuss  
until we trust that love is just for us  
Until it's ashes and ashes and dust to dust

You and I will always be together  
Peace or war no matter the weather  
Me and you like birds of a feather  
Til the wind blows us away  
We stand tall while they fall together  
Gun left I formation like the letter  
Modeling the shelter cause we're built for whatever  
Til the wind blows us away

In each others arms  
It's like heroin love  
That dope fiend forever in love  
But it's better than drugs  
It's heavy on the heart it's still a risk  
But we'll never fall apart we was built for this  
Nuttin' that we can't sort out, sport up, and

thought out  
Erase all doubt  
Go hard and all out

You and my fam fall out  
Most of your family can't stand me  
We can't let that cross out our family plans can we  
Uhuh, we won't get no love from it let's just  
keep it 100 'til we 100  
Stack Grand's 'til we grandparents  
Whatever work but lets hope for the best and expect  
the worse  
Cause we'll have good and bad times together  
But the bad will make the good times that much better  
So let's absorb it  
'Til we scrolled out in coffins in 20-12  
If the world fall out the orbit

You and I will always be together  
Peace or war no matter the weather  
Me and you like birds of a feather  
Til the wind blows us away  
We stand tall while they fall together  
Gun left I formation like the letter  
Modeling the shelter cause we're built for whatever  
Til the wind blows us away

We go together like criminals and crime  
Instrumentals and rhymes  
Clothes and trends like real G's and dimes  
Stone Gems and shine real cream and pies  
Chrome rims and rides like ill teams and grind  
Like identical designs the pentacle to rise  
Flows and ants like skilled dreams and drive  
Home in France like a lil' trees and bobs  
Close as kin like heels, jeans and thighs  
Since I was rocking Giselle's you was hotter than  
hell  
Now it's me and you like Barack and Michelle  
Denzel and Pauletta  
prevail in all weather  
Stand tall while they fail and fall together  
Pleasure and the pain the pressure and the hate  
Through whatever we together like forever and a day  
Checks and dollar signs  
The love for paper  
Better yet like father time and mother nature
