Take a step back, turn around  
Look at the world that you've let down  
My, my, such a disgrace  
The damage is done, you can't replace it  
These are the things your mind will tell you  
These are the things your heart will say  
These are the thoughts that leave you hopeless  
These are the times you say  
There is no way, no way, no way!

But as long as you are breathing  
You can start all over again  
If your heart's beating  
You can start all over again  
Goodbye sorrow  
You can start all over again  
Hello tomorrow  
You can start all over

Wake up to the perfect sun  
The long night is over  
A new day has begun  
Oh yes, dare to believe  
Mercy flows in the morning  
Your spirit is set free  
These are the things your mind will tell you  
These are the words your heart will say  
These are the thoughts that leave you fearless  
These are the hands that point the way

As long as you are breathing  
You can start all over again  
If your heart's beating  
You can start all over again  
Goodbye sorrow

You can start all over again  
Hello tomorrow  
You can start all over

'Cause everything can change  
If all our things are new  
The impossible is here  
And it's crying out for you  
Everything is gonna work out right  
Just like we prayed it would  
You're a miracle in the making  
Yes, it's working for your good

As long as you are breathing  
(You can start all over again)  
If your heart's beating  
(You can start all over)  
Mmmm, goodbye sorrow  
(You can start all over again)  
Hello tomorrow  
(You can start all over)  
Ohh... oh, oh, oh.. ohh...

As long as you are breathing  
You can start all over again  
And your heart's beating  
You can start all over  
Goodbye sorrow  
You can start all over again  
Hello tomorrow!
