## "Bye-bye"

Visit "[Bye-bye](#)" on MotoLyrics.com

Darkness so far away  
From the night of grace  
light of day

Our darkness brings today  
There no reason to fray

Your such a pretty flower  
but now you know that your gonna DIE  
So dry your eyes and wipe your tears  
your not the first to believe a lie  
Your like a red red rose that hunny  
I want to rip you from your vine  
let me know when the lights go dim baby  
what going through your mind

Darkness so far away  
from the night of grace  
light of day

Our darkness brings today  
There no reason to fray

bye bye bye baby your only young but your gonna die  
die die die my lady everything you ever loved is a lie

Maybe on the other side we can learn to lie  
learn to lie of grace  
I want to fly I want to learn to fly

Our darkness brings today  
there no reason to fray

bye bye baby your only young but your gonna die  
die die die my lady everything you ever loved is a lie

bye bye baby your only younger but your gonna die  
die die die my lady everything you ever love is a lie
