Randy Rogers
"I Never Meant To Break Your Heart"

How many times did I tell you
I would always be true
I meant those words when they rolled off my tounge
there was nothin you could do
Well you didn't see it commin
never looked for a sign
sometimes two people they just fall apart
never stop to worry about runnin out of time
but I never meant to break your heart

Well love man its a gamble
but you never see your cards
nobody said it was easy
whys it gotta be so hard
fools they fall head first
but I've made up my mind
well I don't know when we lost what we had
after it, took us both, so long to find
but I never meant to break your heart

Well its not my fault
baby your not to blame
but if the roads were reversed
it would still be the same
but there are times
when i just cant get you outta my head
I can't stay here tonight and get lost in your bed
get lost in your bed

Didn't come here with your answer
think we both know the rules
you know that i will always love you
we both know theres nothin left for you to do
but I never mean to break your heart
but I never meant to break your heart
