Spawned from the filthiest cunt  
The son of God, the nebular whore  
Emerging from darkseas  
Like cosmic rays erase the fog  
And glorify the winterstorm  
Funeral dreams of angels forlorn become unknown  
Now cursed by the moon, I sacrifice the virginborn  
Spawned from a dying womb  
The son of God, the nebular whore  
Emerging from darkseas  
Like cosmic rays erase the fog

And glorify the winterstorm  
Ages before the birth of time and space  
Where no sun's rising on earth's face  
The bitter frost will turn all life to dust  
Sceptres down, inhale some glorious death  
Spawned from a dying womb  
The son of God, the nebular whore  
Emerging from darkseas  
Like cosmic rays erase the fog  
And glorify the winterstorm
