Deep in the twilight lurks a somber place  
People call it Malicegarden  
A realm of sadness the throne of the dead  
Where sunlight is as rare as laughter

Leaving our world to enter Malicegarden  
A journey that will last forever  
A legion of mourners crying the past  
Bedding the remnants deep in silence

Cross the portal and step in Malicegarden  
Touch the fruit of everlasting glory  
Here we will dwell praising endless darkness

Here we will stay for now and ever

Inducing oblivion the sinister path  
Where this garden lies...  
Of malice and grievance the creatures will tell  
A fate lost in ages past  
The throne of destruction, the passionate fruit

Only beyond death it grows,  
for those who enter here

Beyond this hill of fouling flesh  
Beneath the sea of tears  
Lies the heart of Malicegarden  
The castle of ill faith...
