The Turkish army's on the march against

The Crusaders on retreat

The canon roars and the city falls to the enemy

Thousands were sacrificed, driven away at night

Lost their goods

Enslaving the young, killing the old

That's how the story's told

The Christian knights, Dracul on their side

Stop the sultan's invasion

They hold the fortress, ride on their horses

Straight through the enemy lines

Fight them down, most die on the killing ground

The rest runs away

The banner held high up in the sky

The sign of victory

Far away against the demons force

They just fight like brothers in arms

With fear and hate they follw Draculs call

They just fight like brothers in arms

Fight like - Brothers in arms

Fight like - Brothers in arms

Fight like - Brothers in arms

Fight like

Far away against the demons force

They just fight like brothers in arms

With fear and hate they follw Draculs call

They just fight like brothers in arms

Fight like - Brothers in arms

Fight like - Brothers in arms

Fight like - Brothers in arms

Fight like - Brothers in arms

Fight like - Brothers in arms

Fight like - Brothers in arms

Fight like - Brothers in arms

Fight like
