In the heat of the night
Seems like a cold sweat
Creeping cross my brow, yeah

In the heat of the night
I'm a feelin' motherless somehow
Stars with evil eyes stare from the sky
All mean and bright
(In the heat of the night)

Ain't a woman here before
Knows how to make the morning come
It's so hard to keep control
When I could sell my soul, oh, for just a little light
(In the heat of the night)

In the heat of the night
I've got trouble wall to wall, oh yes I have
An' I repeat, oh, I repeat in the night
Must be an ending to us all

Oh Lord, it won't be long
Just you be strong
And it'll be all right
(In the heat of the night)

In the heat of the night
