Uh tony, this song is called lou weed

Well baby just look at lou
Well ya do what you want to do
And nothing less for you
Well whatever will get you through
Now satan you seem like a typical dude
When you notice I'm stayin and starin at you
And I can see you got the heroin blues
Really it looks good on you

Well baby just look at lou
I know women, women want to be seen with you
Well thats ok too
Those women really look good on you
Now you always act so cool
Like your waiting for your man up on lexington ave.
And noone is there to hook up for you
So whos place are you going too
Well baby just look at lou
Yeah baby just look at lou
I said baby just look at lou
Yeah baby look at lou
