If I ever give you all of me
Just a piece of me that you can see
Will you ever make a change for me?
A change in you is a change for me, baby

I said you ought to make a change
Find a way to love yourself
Open up your heart and mind
In there, you will find the key to a new life

The words I'm sorry
Are said a thousand times
But what's it going to take
For you to change your life around?

If you truly want to be happy
Then recognize in yourself
There's a true gift from life
The truth in life

Just a piece of me that you can see
Will you ever make a change for me?
Change in you is a change for me, baby

Take a longer look at yourself
Find the hidden truth and let it exhale
Let me lead the way
Can you vision all the things that I see?

The words I'm sorry
Are said a thousand times
But what's it gonna take
For you to change your life around?

If you truly want to be happy
Then recognize in yourself
There's a true gift from life
The truth in life

Just a piece of me that you can see
Will you ever make a change for me?
Change in you is a change for me, baby

Recognize in yourself, oh yeah

The words I'm sorry
Are said a thousand times
But what's it gonna take
For you to change your life around?

If you truly want to be happy
Then recognize in yourself
There's a true gift from life
The truth in life

Just a piece of me that you can see
Will you ever make a change for me?
Change in you is a change for me, baby

If I ever give you all of me
Just a piece of me that you can see
Will you ever make a change for me?
A change in you is a change for me, baby

If I ever give you all of me
Just a piece of me that you can see
Will you ever make a change for me?
A change in you is a change for me, baby

If I ever give you all of me
Just a piece of me that you can see
Will you ever make a change for me?
A change in you is a change for me, baby

If I ever give you all of me
Just a piece of me that you can see
Will you ever make a change for me?
A change in you is a change for me, baby

If I ever give you all of me
Change, change in me
