They just can't take it away. We won't let it end, all of us together. Tonight I just want to spend with my friends and pray this feeling doesn't end. The years grow longer and our time is shorter, but tonight is ours forever. They just can't take it away. We won't let it end, all of us together. Tonight I just want to spend with my friends and pray this feeling doesn't end. The years grow longer and our time is shorter, but tonight is ours forever. it's me and it's you, it's all of us in this room, it's our time tonight. Tonight, we're going to live forever. Tonight I'm going to live forever.
