Days that I have wasted
Waiting for your call
Nights that I have missed you
But you didn't miss me at all
A hopeless hope I've nurtured
You never let me know
That all the while behind your smile
You planned to let me go

As if you want me
As if you care

All those loving moments
Were just another game
I thought we worked together
But you didn't feel the same
I loved you like no other
My love for you was blind
So why d'you keep pretending
That everything was fine?

As if you need me
As if you care
As if you need me
As if you care

The telepathic glances
Across the crowded room
They didn't mean a thing to you
You knew that you'd be leaving soon
Your kiss became a lie
When your heart began to stray
So why d'you keep on saying
That you wanted me to stay

As if you love me
As if you care
As if you love me
As if you cared
