"Back Home"

Visit "[Back Home](#)" on MotoLyrics.com

I'll build a ship, to sail across the sea
To distant shores, carried by the breeze
From the mists, towards the burning sun
I'll chase the dawn, until my time has come

On my way back home

And all the while, I know that I may fall
Into the void, and it will take us all
For though we try, to force eternal day
The tide will turn, and wash us all away

On my way back home

From where we came, the circle leads us on
To fade away, into the endless song
For all the hope, and all the journeys fears
The wheel goes on, and I will spend my years

On my way back home
