Put away your magazines
Wonder how you stoop so low
Looking deep into what is obscene
Fall again now not again now
A soft touch and you compromise
Looking deep into each others eyes
Knowing full well what you're doing is
Fall again now...not again

Are you ready for monday now
Avoid it you can't somehow you must resist
Temptation won't stop coming at you
Are you ready...for monday now

Stumble down the bottles empty
But the night has just begun
Start with one that leads to many
Fall again now not again now
A deep inhale and you're left smiling
Feeling higher than the clouds
Searching for that distant something
Fall again now...not again

Are you ready for monday now
Avoid it you can't somehow you must resist
Temptaion wont stop coming at you
Are you ready...for monday now
