There's a splinter in my hand
But I'm not complaining
Just by nudging my shoulder
Yeah I know what your thinking

We're coming up empty
Yeah we know what to do now

Let's ride you and me in sidecar one
Our course is set for a collision
For now I'll blame this on
The night because it's almost gone now

I'm good as gold now
The timings so perfect
Time keeps on moving
And ours is almost up

Use your slight of hand now
Yeah you're gone when the smoke clears

Now I miss you and me in sidecar one
Our course is set for a collision
For now I'll blame this on
The night cause it's going wrong yeah

You and me in sidecar one
You and me in sidecar one
Our course is set for a collision
For now I'll blame this on
The night because it's almost gone now

The night is almost gone now
The night is going wrong yeah
The night is almost gone now
The night is gone forever
