Hello sports fans the year is nineteen seventy-seven  
the saints are down by four and the yankees just won  
the pennant and there's no call no letter no signifying  
action except the one that still stands today it's all in  
your head now and it's all in your mind two is too much  
to leave behind sensei that's just one term we never  
needed and it's fair now that's fine we're not bitter so  
where are you now better yet where were you then look  
at this cycle it's building up it's all in your head now and  
it's all in your mind or was this cancer too defined
