Please stay for a while there's no need to leave  
The night is still young I need you here with me.  
When your by my side feel like i got everything,  
like the world is passing by me.

These nights just mean so much to me.  
I feel like i've got everything.

[pre-chorus]

Its like im in a dream when your there by my side  
but i never wake up its so amazing inside.  
And i wish this could be till the end of all time,  
please stay here with me.  
Without you my life would be so incomplete.

[chorus]

You make me feel so amazing inside....  
And I wish that kept going full time  
Your like my own star guiding me through this life

I'd be lost without you by my side  
All those times that we've had, all those moments  
We've shared, you are my everything  
I put down my guitar,  
Leave my home just to see,  
You feel the same way about me

As these days pass on by, we both  
Have memories to share, we'll stay up all  
Night watching stars, and then we'll drive all through  
the  
Night, sleep all through the day, then ill wake up by  
your side  
And thank god that I'm here

These nights just mean so much to me.  
I feel like i've got everything.

[pre-chorus]

[chorus]
