Earthquakes, fires, hurricanes. Now that it is way too late. We didn't listen when we had the chance, and now the world is under attack! You say its because we've sinned. It's God's wrath, the things we did like homosexuality. You say we have no morality, but you ignore the scientific explanation. There's no debate when the facts and the numbers are right in front of your face! Just take a look back now. There's no way now, but the warnings were loud and clear. You silenced the sirens so we couldn't hear. So we found these prophets right, and the storms grow stronger in the night. We all just want back our normal lives, but that just won't be good enough now. Look what we have done to this planet. Look what we have done. We've destroyed it!
