Danger To The System
"You All Believe"

Everything you thought you wanted,
Everything you thought you'd need

Came along, and brought you down.
And now you're left alone crying.

They always seem to say the sweetest things
Finally he made it clear
Finally she made a move, focus now,
Don't give up hope, there's always something you can
do

To make it through, you've got so much to prove

[pre chorus]
Foolish girl don't waste your energy,
Don't waste integrity, he's not worth anything

Foolish boy don't waste your dollar bills
she'll be gone by tomorrow,
start up with the sorrow

[chorus]
You all believe, you all believe
That love is gonna save us
But nothing good comes from it trust me
You all believe, you all believe
That love is coming to you
But it's your death, you'll finally see

Pull you up a little higher
Make the fall much more Severe
Now Your waiting at the bottom bleeding
And noone appears to save you cause
your fate seem so surreal
So surreal

[Pre chorus]
[chorus] [x2]

Now let me tell you a little something about

All my love
Let me tell you a little something about
All my love, let me tell you tell you tell you.

All you people giving your selfs up to it.
All you people giving into your hearts.
All you people giving your selfs up to it.
All you people giving into your hearts.
Start up with the sorrow

[chorus] [x2]
