So this is how you wish to portray yourself to the ones  
you love and to the ones you have just met?

This is not a desire reflection

This is just and easy way for you to regress

This relentless mirage, will cause you to subside

Your perception will be cured, as clarity arrives

Time to disband the hubris

Disband the hubris

Disband the hubris

Let go, let go, let go

Disband the hubris

This relentless mirage, will cause you to subside

Your perception will be cured, as clarity arrives

So this is how you wish to portray yourself to the ones  
you love and to the ones you have just met?

This is not a desire reflection

This is just and easy way for you to regress

Nothing can speak louder than silence when all you  
want

Is to understand yourself. I cannot hold you hand

Proceed to progress

Proceed to progress

Proceed to progress

Proceed to progress

Nothing can speak louder than silence when all you  
want is to understand yourself

Nothing can speak louder than

Silence when all you want

Is to understand yourself
