Grace in light  
Somehow I found you here  
Told from the hope and fear  
That holds us inside  
Pull me out

Look from the world I've known  
And all that was broken, cold  
Broaden me in here

Chorus:  
From you, one look  
Just one look  
And everything is shattered  
From you one word  
Towers burn  
And fall, fall apart

Just be still  
Arms that surround like the sun  
Facing the life we've begun  
and holds us inside

Repeat chorus twice.

Fires curl, shadows swirl  
A hollow sound  
That no one else can hear  
But me in silent streams  
Forever more  
We dream
