"From Beyond The Grave"

Dusk spreads over this cemetery, the ground appears
deceased
Lifeless forms but the sky, out here all life has ceased
Putrid odours rising, from beneath the ground
They climb up from the tombs, with a freezing horrid
sound
From beyond the grave - from beyond the grave
Exquisite stench of death, insurrective resurrection
Arisen from the dirt, putrefactive infestation
Brought... back... from the dead
Lifeless... eyes... in their maggot infested heads...
Dusk spreads over this cemetery, the ground appears
deceased
Lifeless forms but the sky, out here all life has ceased
Putrid odours rising, from beneath the ground
They climb up from the tombs, with a freezing horrid
sound from beyond the grave, from beyond the grave
Scum of the earth, obliquity in the creation awakened
by mistake, overdose of radiation
Terminal deadforms unleashed, in a morbid re-
animation
Accidentally unearthed, it's evils resuscitation
Scum of the earth, obliquity in the creation
Awakened by mistake, overdose of radiation
