Epitaph above your head  
For many years you've been dead  
Maggot brain - Pus filled eyes  
In a moldy casker [casket?] you reside

Your the dead, your heart is black  
Lived your life in blasphemy  
Now you rot day by day  
Eternal torture, slow decay

Your body's filled with rotten worms

Skin falls off your bones  
The moon ignites your dried up corpse  
How decrepit you have grown

Your reek of shit and rotten guts  
Embalming fluids - Rancid crud  
Released from hell you walk the earth  
Your rotten corpse give new birth
